LUCAS SEHNEM

Technical Product Manager I AI Products & SaaS

Discovery · Roadmap · Monetization · LLMs · Engineering Delivery

Santiago, RS · Open to remote **lucas.sehnemb@gmail.com** **linkedin.com/in/sehenth** **lsehnemportfolio.pages.dev**

Summary

Technical Product Manager with 7+ years in technology and Web3. Co-founded and built ProfResolve, an AI SaaS for teachers with 1,200+ registered users and active monetization via subscriptions and credits: led discovery with 100+ teachers, defined roadmap and monetization, and designed LLM reliability (provider fallback, circuit breaker, automatic credit refunds). In Web3, worked in Customer Success, Growth, Product Ownership (Nodes-as-a-Service), and project management.

Professional Experience

ProfResolve

Co-founder & COO I Technical Product Manager

2026 – Present Brazil / Remote

- Co-founded and lead product at ProfResolve, an AI SaaS for teachers, with 1,200+ organically registered users and recurring revenue from subscriptions and credit purchases.
- Ran discovery with an open survey to 100+ teachers and continuous user feedback to guide product priorities and evolution.
- Defined roadmap, UX and prioritization, plus the product's hybrid monetization, combining monthly plans with one-off credit packs, calibrating the price of each generation to the cost of the AI model.
- Built the product end to end as the sole developer, including frontend, backend, database, authentication, payments, storage, APIs and integrations.
- Designed AI reliability mechanisms with fallback across providers, retries, circuit breaker, observability and automatic credit refunds on failures.
- Made product and architecture decisions from trade-offs observed in real usage, including reverting SSE streaming when predictability and content integrity became more important than progressive response.

Cripto Host

Product Owner & Project Manager I Web3 Research

2025 – 2026 Remote / Latin America

- Defined and prioritized the backlog for the Nodes-as-a-Service offering, structuring requirements and tracking delivery with engineering.
- Researched and qualified 100+ blockchain node opportunities; 20+ were configured and made commercially available by Cripto Host.
- Turned blockchain infrastructure research into requirements and technical specifications to guide product decisions and implementation.

TRON DAO Ecosystem

Growth, Customer Success & Ecosystem Projects

2019 – 2025 (5+ years) Global / Remote

Hired via DLive.tv (2019 – 2021) → Freelancer (2021 – 2023) → Direct hire TRON DAO (2023 – 2025)

- Supported users and creators globally in Portuguese, English and Spanish for 2+ years, keeping average response time under 5 minutes and an average volume above 65 tickets per day via Zendesk.
- Led onboarding, localized articles, website and interfaces for Brazil and documented support processes.
- Starting in 2020, connected recurring user issues and feedback to product teams, contributing to improvement discussions and tracking digital solution implementations.
- Contributed to the HTX campaign migrating thousands of users, coordinating Product and Growth stakeholders.
- Served as the Latin America regional reference in the ecosystem, bringing context and feedback to global teams.

Bit2Me

Community Manager and Social Media Manager

2022 – 2023 Global / Remote

- Founded the Bitmeiros community on Telegram, from zero to 10,000+ members in under 5 months.
- Planned and led Bit2Me's content and communication strategy in Brazil, aligned with the global team in Spain, producing content for YouTube, TikTok and Instagram and collaborating with local influencers.
- Handled daily engagement and collected user feedback, passing insights from the Brazilian market to Bit2Me's global teams.

Professional Experience (continued)

Play9 / NineBlocks

Product Discovery & Project Management I Web3 Research · Formal role: Community Manager
2021 – 2022 Brazil / Remote

- Worked on discovery, technology research, and Web3 projects, connecting user needs and CRM data to requirements definition, backlog, and discussions with development teams.
- At NineForest, a blockchain- and NFT-based platform for carbon credits, I took part in discovery, technology research, backlog management and technical decisions.
- Took part in Web3 initiatives with MRV Construtora, Volkswagen and Globo, and in community and positioning decisions with the senior team, in collaboration with product and development teams.

YouTube / Independent

Content Creator across Multiple Channels
2010 – Present Brazil

- Built channels with 60M+ views, 250k+ followers and 2,500+ videos, managing content strategy, metrics and organic growth.

Selected Projects

Super Squad AI

AI Product · Multi-Agent Systems · Personal project (own use, non-commercial)

- Developed a local multi-agent orchestration product for software development, structured as Leader + Workers, with isolated execution using Git worktrees and state persistence in SQLite.
- Structured planning, agent selection by capabilities, autonomy control, failure recovery and two-stage verification before merging changes.

Project Aurora

Product Lead & Game Design Lead I Unity · 2026 – Present

- Lead a team of 3 in developing a 2D game, defining product vision, scope, roadmap, gameplay systems, and development priorities. Structured the Game Concept Document and proof of concept (PoC).

Education

Bachelor's Degree in Business Management
Centro Universitário SENAC

Certifications

- **AI Product Management Specialization** I Duke University I Coursera
